# Xiaoyan QIAN

(+65) 9335 9288
xiaoyanqian1010@gmail.com
http://xiaoyanqian.github.io/
Clementi Ave 5, BLK 340, Singapore

## Education Background

- 2013-2016: M.Eng. in Industrial Engineering
  - Zhejiang Science and Technology University (ZSTU)
  - Overall GPA: 4.29/5 (92.90/100)  Ranking: 1/125
- 2009-2013: B.Eng. in Industrial Engineering
  - Zhejiang University of Technology (ZUT)
  - Overall GPA:  3.73/5 (87.30/100)  Ranking: 1/35

## Research Interests

- System Analysis
- Statistical Analysis
- Decision-making under uncertain
- Operation research

## Selected Publications

- Xiaoyan QIAN, Renwang LI, *et al*. "Modeling Carbon Footprint of Tobacco Industry Based on PLC Across the Supply Chain", *International Journal of Advanced Manufacturing Technology*, **2016**. (Under Revision)
- Wu X, Li R, Qian X, et al. The value network optimization research based on the Analytic Hierarchy Process method and the dynamic programming of cloud manufacturing[J]. The International Journal of Advanced Manufacturing Technology, 2015: 1-9.
- Ning LI and Xiaoyan QIAN. "Simulation and Optimization of Assembly Workshop Production Logistics Based on ED", *Modular Machine Tool & Automatic Manufacturing Technique*, (4): 154-160, **2014**.

## Research Experience

- **The Smart Spare Part Inventory Management (Dec. 2016 - present)**
  - School of Electrical & Electronic Engineering, NTU, Supervisor: Prof. Wu Kan
  - Overall aim: We develop scheduling algorithms for furnaces in semiconductor wafer fabrication facilities (fabs) to meet the production goals.
  - My part: mainly take in charge of establishing GUI using Asp.net and C#
- **NTU Forecast System (Aug. 2016 - present)**
  - School of Electrical & Electronic Engineering, NTU, Supervisor: Prof. Wu Kan
  - Overall aim: we develop preventive maintenances (PMs) are performed on the equipments in the fab to reduce unanticipated machine failure or breakdowns.

- My part: mainly take in charge of establishing GUI using Asp.net and C#

- **Product Lifecycle-oriented Modeling and its Application for Carbon Footprint in Supply-Chain Environment (Jan. 2015 – May. 2016)**
  - Natural Science Foundation of China, Supervisor: Prof. Li Renwang
  - Overall aim: Build and apply a carbon footprint analysis body in order to mitigate the green-house effects
  - My work: Construct models for calculating carbon footprint, simulate models into Tobacco Industry and constantly optimize these models
  - Achievement: Be able to locate where carbon footprint was excessively emitting
- **The System Layout Planning Program (Sept. 2012 - June 2013)**
  - Supervisor: Prof. Luo Guoxun
  - Overall aim: Optimize technological process (Low-input and high-output)
  - My work: Established original and optimized models in Enterprise Dynamics
  - Achievement: The cross of logistics were relieved
- **Ontology-Driven Data Extraction and Calculation Method of Product Carbon Footprint based on Life Cycle (June 2015 - present)**
  - Natural Science Foundation of Zhejiang Province, Supervisor: Song Jinyu
  - Overall aim: Develop an ontology-driven system for carbon footprint data extraction, model, semantic, mutual operation in the production life cycle
  - My part: Construct a calculation and evaluation framework of carbon footprint by using PAS 2050 and ISO14067
  - Achievements (Expected): Be able to evaluate the low-carbon supply chain management effectively

## Selected Honors and Awards

- Second Prize Scholarship for Excellent Postgraduate Students, 2014
- Excellent Student Leader, ZUT, 2013
- Second Prize for Provincial Undergraduate Mathematical Competition, 2011
- National Encouragement Scholarships and Excellent Undergraduate Scholarships, 4 times, 2010-2013

## Professional skill

- Software: Asp.net, MATLAB, Enterprise Dynamics, Auto CAD, FlexSim, Visual Studio
- Coding: C#, Python, html, CSS, JS
- Language: Chinese (native), English (IELTS: 6.0/9.0)

## Work Experience

- Researcher in school of EEE at NTU, 2016.8- so far
- TA for the graduate course “Operation Research”, 2014-2015
